Title: Certifiably easy: new CertifiedPDF Web service from Enfocus
Authors: Lamont M
Source: PrintMedia vol. 18, no. 6, Nov.-Dec. 2003, pp 34, 36
ISSN: 1048-3055
Publication Year: 2003
Document Type: Journal Article
Language: English
Pira Subfiles: Printing and Publishing (PP)
Journal Announcement: 0403
Abstract: CertifiedPDF.net from Enfocus Software, USA, is a user friendly, highly featured online resource for portable document format (PDF) specification and related content. Graphic designers can subscribe, free of charge, to various industry standard PDF specifications, including PDF profiles, Adobe Acrobat Distiller settings, **action** lists, and InDesign **print** styles. All the profiles are published by industry associations, printers, publishers or other contributing members. **Certain application programs** from Enfocus can be automatically linked to the CertifiedPDF.net service and be automatically updated with the latest PDF specifications. E-mail notification is also available. The website also has a database of several hundred tips and solutions to common PDF related problems, a comprehensive PDF guide, white papers, products and standards documentation, and other useful PDF related resources. The site also has links to many European and North American graphic arts associations that have declared their support for Certified PDF workflows. Access to CertifiedPDF.net is free for subscribing members who get full access to all published specifications, download them, and import them directly into applications, databases, or folders. (www.certifiedpdf.net).

Title: And yet it functions: electronic management system for Swiss printer

Authors: Guntensperger R

Source: Viscom Print Commun. vol. 6, no. 23-24, 9 Dec. 2003, pp 7-10

Publication Year: 2003

Document Type: Journal Article

Language: German

Pira Subfiles: Printing and Publishing (PP)

Journal Announcement: 0402

Abstract: Gutenberg AG is the first Swiss printer to use electronic planner management software developed in conjunction with Printplus AG. The pilot project at this traditional **job printing** firm confirmed its commitment to use the most modern organisational tools and ensured that this solution was the correct **one**. **Software** is a useful tool for help with 80% of a task, with human knowledge needed for the remaining 20%. The electronic planner is of use only when based on sound organisation. A work station with two monitors shows diagrams of the steps and sequences of orders. The display presents ideal and actual timings for each cost position. Capacities are reviewed against planned orders. Problem areas are highlighted for attention. The electronic planner is fully integrated into Printplus Druck software so that all internal and external effects are included. Operational data collection (BDE) terminals provide useful production data for the planner. An electronic planner can involve staff more comprehensively than a paper table, and here has replaced job sheets. Swiss firms have long been reluctant to commit to electronic planners, partly as earlier versions proved too complex and not sufficiently adapted to printers needs. Experience at Gutenberg AG may help change these attitudes.

Title: Networking in the printing shop, the major topic

Authors: Anon

Source: Visio Print Commun. vol. 2, no. 3, 9 Feb. 1999, pp 26-28

Publication Year: 1999

Document Type: Journal Article

Language: German

Pira Subfiles: Printing and Publishing (PP); Printing Abstracts (PT)

Journal Announcement: 9905

Abstract: Digital integration of the printing press into the finishing process is the key to a networked **printing operation**, with **individual process** steps growing into networked systems. A careful investigation is needed to determine just how much networking is needed to optimise productivity, print quality and production reliability. The CIP3 concept for integrating prepress, press, and postpress is being developed by a group of about 30 manufacturers. Heidelberg's efforts in this sector are described. These involve both the Data Control complete system, and also more modest solutions for the acceptance of prepress data. Plug and Print on the Speedmaster press was introduced at Ipex 1998. This CPC 2000 press control unit simplifies operations.

Title: Preflight testing of PostScript files: tools for aiding production workflow
Authors: McIlroy T
Source: Seybold Rep. Publ. Syst. vol. 26, no. 8, 30 Dec. 1996, pp 15-19
ISSN: 0736-7260
Publication Year: 1996
Document Type: Journal Article
Language: English
Pira Subfiles: Printing and Publishing (PP); Printing Abstracts (PT); World Publishing Monitor (PU)
Journal Announcement: 9705
Abstract: A discussion is presented of PostScript preflight theory, and a background to the preflight process is **given**. The preflight **process** was developed to overcome the problems associated with estimating, planning and producing a **print job** electronically. Traditionally in the graphic arts field an art board was used to display the work of designers and publishers, which was called a mechanical. Electronic mechanicals lacks the advantages of the original mechanicals, and preflight testing is a method to overcome the worst of the problems associated with electronic printing and publishing. Details of preflight theory are given, and the advantages of preflight checking for prepress workflow are examined. The type of errors that should be caught are outlined. (3 fig)

Abstract: ...frequently incompatible, but the situation is improving as manufacturers build better drivers into their programs. Pan Overseas' PreScript software interpreter converts PostScript printer output into **LaserJet commands**. It is a protected-mode memory-resident program that is potentially incompatible with such 386-specific programs as Microsoft Windows/386. The user must replace several Windows device drivers, a process that forces the user to reinstall the program. Windows has a...

Text:

...0 didn't let you set type within the program, and it had no drawing tools of its own--it didn't even have a **Print command**. It was, if you'll pardon the expression, a rather **one-dimensional program**.

Dimensions 2.0 is here, and is it ever an improvement. It still dovetails with Illustrator, but it also sports a well-rounded set of...

Starting from scratch

Ferris, Fred

American Printer v214n5 pp: 30-33

Feb 1995

ISSN: 0744-6616 **Journal Code:** APR

Word Count: 1877

Text:

All printers understand and have experienced the quest for that quality paper stock most suited to specific **print jobs**. No matter what the final printed product will be or what **specific** printing **process** will be employed, customers insist that the piece meet their exacting expectations. Quality paper is the hinge pin on which the entire process revolves.
Have...

New ways to deal with an old problem

Smalley, Eric
Network World v10n6 pp: 29-32
Feb 8, 1993
ISSN: 0887-7661 **Journal Code:** NWW
Word Count: 3620

Text:

...an application. The print job is passed to a network node or network-attached printer running print server software, which places it in its queue. **Given** the right **software**, the print server then examines the **print job** in the queue and determines that it is a PostScript document. The print server then knows to forward the job to the next available PostScript...
